

DR. RICHARD WILLNER * CLEAN HANDS AWARD 2010

Civil litigation is not for everyone. Dr. Willner is successful at keeping physicians employed, often facing seemingly hopeless odds. Ten years assisting the shammed, Dr. Richard Willner has an excellent track-record and an impressive network of contacts, including lawyers, across the nation. Dr. Willner says, *"Litigation is very time-consuming, one is out of the OR for prolonged periods of time, it costs a fortune, and not to mention that the rate of success is very poor."*

Dr. Willner notoriously masterminded the resignation of an entire State Podiatric Medical Board. Among the many 'thank you' letters you'll find examples of gratitude for expunging records, reinstated licenses, and prevented data banking. There is even a note thanking Dr. Willner for assistance in a case regarding a neurologist subjected to a criminal trial. The note went on to document that his license to practice medicine was reinstated, thanks to Dr. Willner.

Dr. Willner applies a sound approach to prevent Data Banking in the first place, by successfully counseling physicians labeled as "disruptive" and getting them back into practice within the specified time limits. In extreme cases, Dr. Willner has miraculously achieved expungement of entire cases!

SSI commends Dr. Willner for untold hours of mentoring and counseling. The sheer body of work, over ten years, attests to the love of medicine and deep admiration which Dr. Willner has for physicians. SSI President, Roland Chalifoux invites you to visit Dr. Willner's website at:
